

WHO WE ARE

The Utilities Technology Council (UTC) is the trusted advisor to utilities and other critical infrastructure providers globally. The Council serves as the source and resource for our members to deploy technologies and solutions that deliver secure, reliable and affordable mission critical services.

From its headquarters just outside Washington, DC, UTC provides the following services to our membership:

- Manage telecommunications and information
 technology more effectively and efficiently
- Identify and capitalize on opportunities linked
 to deregulation worldwide
- Voice their concerns to legislators and regulators
- Network with other telecom and IT professionals

Through advocacy, education and collaboration, UTC delivers exceptional value for today's decisions and tomorrow's planning.

WHY IT MATTERS

Utility Telecommunications Systems are Critical Infrastructure and "We are the only trade association that looks across the utility segments, electric, gas and water, with a focus on this niche of communications infrastructure issues."- Joy Ditto, UTC President and CEO

- UTC is the only trade association dedicated to the intersection of telecommunications and technology at the utility.
- Through advocacy and educational efforts UTC is the voice of our members to lawmakers, federal and state agencies and regulatory bodies.
- Spectrum allocation and protection of interference-free communications are crucial for utilities around the world to operate safe and reliable services.
- UTC is a trusted resource for rural and urban utility services including broadband, fiber and distributed energy resources.
- With the convergence of IT and OT, the challenges of cybersecurity and the growth of smart communities, UTC is leading the way forward for our members.

MEDIA KIT OVERVIEW

The 2020 UTC Media Kit outlines the many opportunities for engagement and interaction with our unique audience. The marketing industry evolves as fast as utility industry. At UTC, we have kept pace, and this year, we have some new offerings to make sure the right connections are being made. One exciting development is that our Industry Intelligence newsletter will now be available on our website, expanding its reach beyond our membership. In the upcoming pages, we will walk you through the different platforms available to your organization to foster collaboration and get your message heard.

MEET OUR TEAM

ROBERT THORMEYER Director of Communications and Advocacy rob.thormeyer@utc.org 202-872-0030 As Director of Communications and Advocacy for the Utilities Technology Council, Mr. Thormeyer focuses on external communications, message development, and press relations. Prior to joining UTC, he served as an advisor for former Federal Energy Regulatory Commission Member Colette D. Honorable. Mr. Thormeyer began his public-relations career at the National Association of Regulatory Utility Commissioners as its Director of Communications. He received his bachelor's degree in History from Mary Washington College (now the University of Mary Washington) in Fredericksburg, Va.

CHERYL STRATOS National Sales Representative cheryl.stratos@utc.org 703-926-5615 For more than 25 year's Cheryl Stratos has worked in the Utility construction and communications space representing various trade associations. Ms. Stratos has a strong background in economics and has extensive experience in research and program development. She is active in the association community and a volunteer Board member of the Melanoma Research Foundation (MRF) Chairing the Development Council and is part of the Executive Committee. She also consults with various trade associations helping to develop creative sales strategies. Her special interests include: riding and showing horses, and a love of aviation, plus spending time with her family.

SHAWN MCCLAFFERTY Designer shawn@thinkdesignsllc

shawn@fhinkdesignslic 919-606-1339 Shawn McClafferty has over 20 years of advertising experience with a focus on Graphic and Web Design. He has a strong understanding of retail marketing, healthcare, and information technology. Mr. McClafferty's creativity shows itself in his work and he has won many accolades for his creations and illustrations, including two time winner of artSPARK Street Painting. His business is to create compelling visual messages in both print and digital media to effectively market brand and business on behalf of his clientele, which includes UTC, ALS (Lou Gehrig's disease) & North Carolina Mutual Drug.

DIGITAL MARKETING OPPORTUNITIES

QUARTERLY PRINTED JOURNAL

EDITORIAL CONTENT

The UTC Journal is the official quarterly publication of the Utilities Technology Council (UTC) and serves as the leading source of information for UTC members— Information and Communication Technology (ICT) and critical infrastructure professionals at energy and water organizations across North America. Through insightful case studies, research, regulatory related news and emerging technology articles, the UTC Journal provides readers with practical solutions to the issues, challenges and opportunities in the industry.

JOB FUNCTIONS OF SUBSCRIBERS

As a product and service provider to the critical infrastructure communications space, there is no better vehicle for your advertising budget. With editorial that addresses the key issues UTC members face, showcase your products and services to engaged readers and influential decision-makers. To make advertising even more effective, we work with you to develop a comprehensive package that pairs print advertising with digital programs such as member newsletters, webinar sponsorships, as well as exhibit and sponsorship opportunities at one of the many UTC events throughout the year.

REGULAR FEATURES INCLUDE:

The Value of Membership Highlights the value of UTC membership through case studies and member testimonials.

Workforce & Mentorship Spotlights mentorship as a tool to bolster future work force and develop best practices.

Chairman's Corner UTC's current Chairman of the Board welcomes readership and provides food for thought on the latest industry news.

UTC Associate Member News Features a collection of associate member press releases and product announcements.

Best Practices Series Presents successful best practices from leaders in the industry.

Forward!

UTC's President and CEO Joy Ditto delivers important industry issues and how they affect critical infrastructure, IT/OT and telecommunications professionals.

Vendor Spotlight Lets our vendors tell their story and share their customer successes.

Inside Washington & Regulatory Update Is devoted to the analysis of key regulatory and legislative updates.

Thought Leadership Highlights ways in which UTC staff and members engage in important thought leadership in the utility industry.

Global Spotlights Focuses on UTC global entities.

SPECTRUM	12.28.19			
Utilities need access to interference-free spectrum. This is true today as it was years ago. But what's different is the changing nature of the utility itself. As utilities modernize their systems to enable more efficiency, customer engagement, and cleaner sources of electricity, their spectrum needs will grow and change as well. This issue of the Journal will explore the latest on critical bands like 6 GHz and other opportunities for growth. BONUS DISTRIBUTION	12.20.17	1.04.20	1/13/20	02.28.20
UTC Spring Regional Meetings				
 Workforce Development Utilities are entering a critical time. In addition to updating and modernizing their grids, they are also bringing on the next generation workforce to empower these changes. In this Journal, we will focus on the UTC Foundation and how it will help address some of these questions. The issue will also discuss ways utilities can empower the next-gen workforce and transfer knowledge from one generation to the next. BONUS DISTRIBUTION • UTC Telecom & Technology 	02.01.20	2.08.20	03.09.20	-05.04.20
Cybersecurity The threats to the grid are growing by the hour. In this issue of the Journal, we will explore what's next on the cyber landscape, including updates on federal and industry actions. What do utilities need to be focused on in this new era? What's the latest out of Washington and elsewhere? What new trends should your utility be watching? BONUS DISTRIBUTION • UTC Fall Regional Meetings	06.03.20	06.10.20	07.17.20	-08.31.20
DRONES	09 05 20	09 12 20	10 19 20	12.07.20
Drones have the potential to dramatically change how utilities monitor and maintain their infrastructure. They also raise security concerns as well. In this issue of the Journal, we will focus on how utilities are using drones and what they need to know about the latest federal regulations. How can drones assist in storm response? This issue will feature a case study on how one utility is using drones and how it addresses the concerns drones can pose.	-
